

# Faria's Festival Finder

Canja The Faria

# Where to find the most appropriate Indie Film Festivals?

- For independent filmmakers to grow, they need to promote their movies in Film Festivals to get more attention.
- Multiple film festivals occur every year, so which ones should be chosen to submit the movie?
- We intend to help moviemakers find the festivals more appropriate to promote their films.

# Where to find the most appropriate Indie Film Festivals?

- Different festivals exhibit different genres, so our objective is to choose those where the festival's target audience will more likely resonate with the movie and help the filmmakers' career grow.
- With more suggestions comes more opportunities to promote the film. Our project prioritizes festivals happening sooner and near the location of the user.

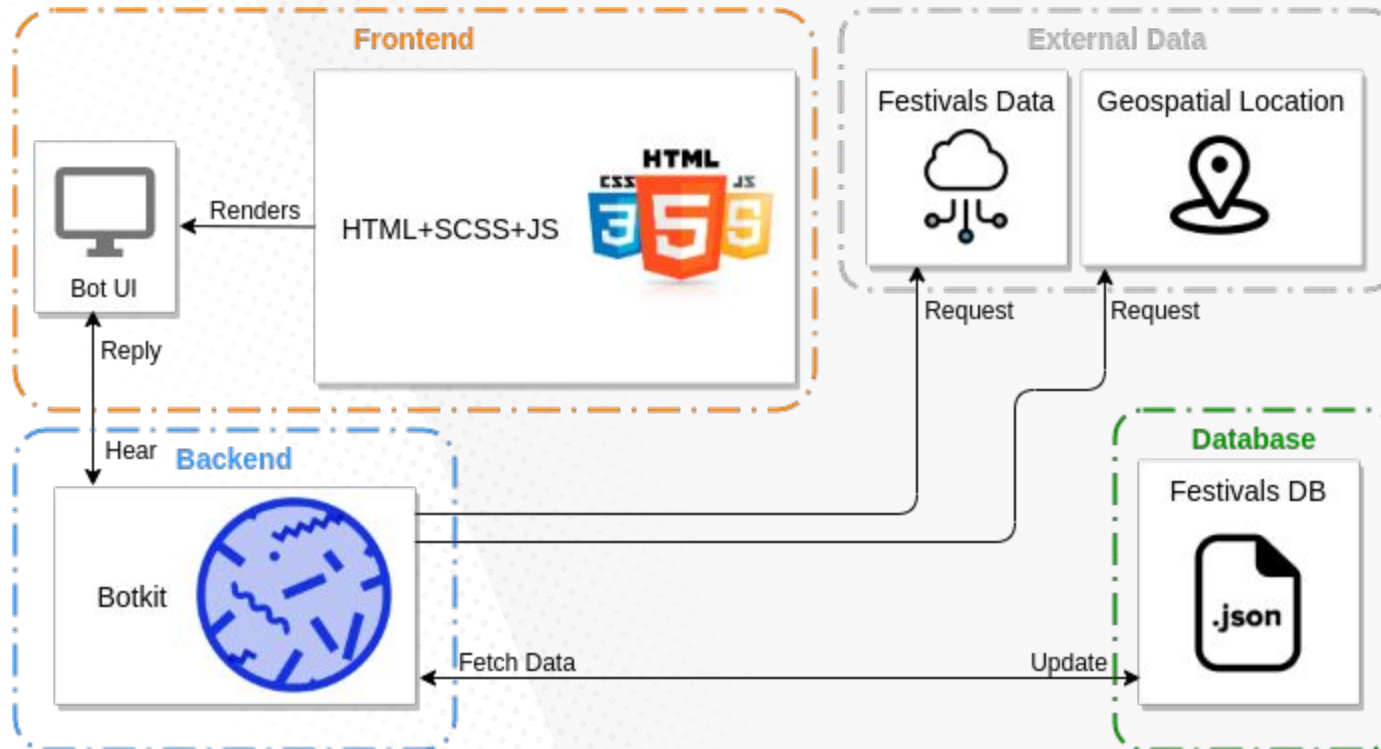

# Dataset characteristics

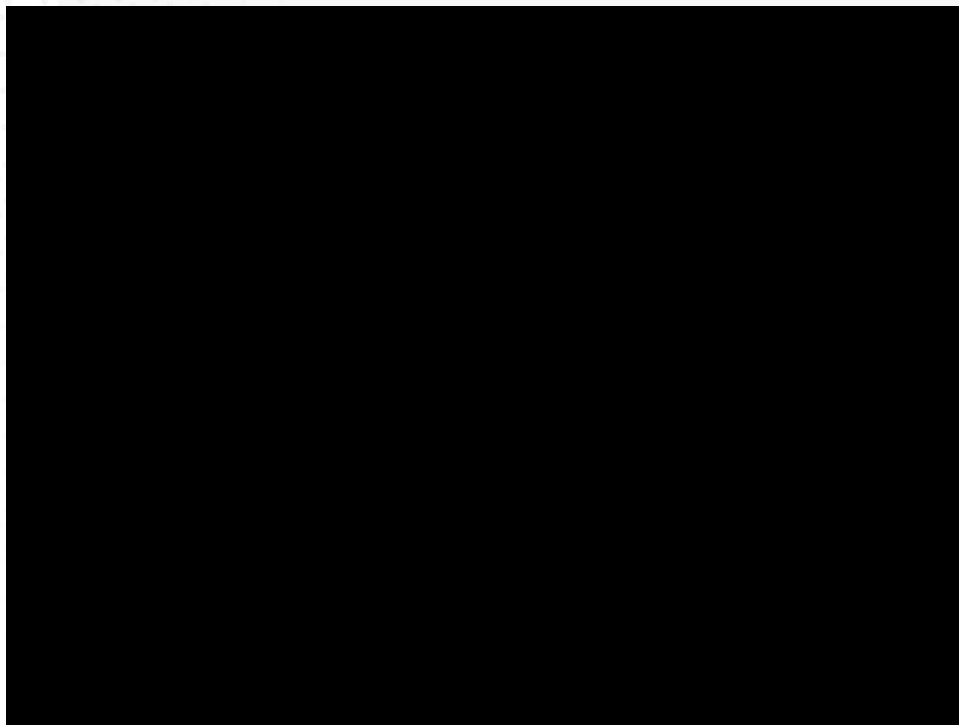

- For this project we used a dataset of 546 recurrent film festivals from Wikipedia, across all continents, and including travelling and online festivals as well.
- We then use the genres each festival focuses on, to filter according to the users' search terms.
